AP#5

Parametric splines for letters

Problem 5.1

- ▶ Choose at least 3 digits or letters of some alphabet
- ▶ Post selected problem in the chat
- ▶ Allowed: built-in libraries for splines
- ▶ Requirement: fit splines to the selected digits or letters, visualize.
- ▶ Experiments: does choice of spline and its nodes affect the fitting quality?
- ▶ Deliverables:
 - ▶ working code with comments
 - ▶ 2 page paper explaining your work: model, approach, experiment, conclusions
 - ▶ 3 min video for TA with explanation and demonstration of your work
- ▶ Deadline: 5 days after publication of AP

Important Notice

Important Notice

- ▶ Test your code, it should work properly for an input assigned by TA or instructor.
- ▶ AP assigned 0 points if:
 - ▶ a model problem provided twice by students. Make sure, your model is different from models provided by others.
 - ▶ submitted results are not reproducible
 - ▶ student cannot apply his own code for data or norms provided by TA or instructor
